

# CALL FOR PRESENTATIONS

**Dear NVF colleagues and Colleagues in the Europe  
We are organizing a free NVF webinar “Improving  
Road Safety for Young Drivers” in March 7th 2023.**

CFP

We want to **invite you to share** a case study, an observation, a vision, a discovery, a project or a pilot with road and transport professionals who are concerned about road safety for young drivers.

One in five road fatalities and one in three injuries occur to young drivers (15-24 years) in Finland. With your help, we want to find successful ways to improve road safety for young drivers. **How to reduce crashes for young drivers? How to raise safety conscious young drivers?**

We are looking for the best available practices to improve the current situation with young drivers. We are also looking for best practices in sectors other than road transport. **Please send us a short proposal/summary of your work or reveal your colleague who has done amazing work** in this area by email to address: [tapahtumat@tieyhdistys.fi](mailto:tapahtumat@tieyhdistys.fi)

We are expecting proposals before the **1st of October** and the program is going to be released in November/December 2022.

Please mark on your calendar **the webinar day 7th of March 2023 at 13:00 (+2 UTC).**

Best regards,  
NVF Finland Road Safety Team
