- Realistic fullscale simulator vs simple version.
- Training according to Norwegian curriculum – **Vision Zero**
- Starting at age 15, offering training course before practising in real car. Non traditional way of training.
- Using simulator 3 evenings (short lesson) at stage 1 basic course.
- High focus on understanding of risk at an **early** stage of training, observing a behavioral change. Doing exercises we cannot allow in a real car. Own experience
- Very effective training. Practicing what should not happen
- Driving at night, next issue
